On page 7, paragraph beginning at line 16, please amend as follows:

In the example being illustrated, the CDMA communication system is assigned with zeroth through fifth spreading codes C0, C1, C2, C3, C4 and C5~~C4, C5, and C6~~. In addition, the zeroth and the first spreading codes C0 and C1 are assigned to the reverse channel as reverse spreading codes while the second through the fifth spreading codes C2 to C5 are assigned to the forward channel as forward spreading codes. That is, the reverse channel is assigned with the reverse spreading codes while the forward channel is assigned with the forward spreading codes. The reverse spreading codes and the forward spreading codes are different from each other.
